STUDIOMAN Update – Version 1.6 Installation Instructions

The STUDIOMAN update file must be opened on the computer that has STUDIOMAN installed on it. If you have STUDIOMAN running on a network of computers, the update file needs to run on all of the computers on the network.

If you have STUDIOMAN running on your Intel based Mac with Windows, you need to open and run the installation file on the Windows side.

Download the update file from our website:

- 1) Visit www.studioman.ca/support and click on the link titled "STUDIOMAN v1.6 – Released May 27, 2011"
- 2) Click "run" if you are on the STUDIOMAN computer. (If you are not on the STUDIOMAN computer, choose "save" to save the file to a USB memory stick, or some other portable drive. When you are at the STUDIOMAN computer, open the folder you saved the file in and double click on the "studioMAN update v1.6.msi" file.)
- 3) Click "next"
- 4) When asked to select the installation folder, choose "everyone".
- 5) Click "next"
- 6) Click "next" to confirm the installation.
- 7) When the installation is complete, click "close".

***Note: Depending on the version of Windows you are currently running, some other messages may appear. Please select "allow" or "unblock" for all of these messages.
